Providing Color to your patients

1. Grab a Color Kit, patient brochure, and order form
   • Remove a barcode sticker from the back of the clear plastic box in the kit and apply it to the order form.

2. Collect credit card information and email address
   • Write credit card info and email on the order form, or just enter it directly into the online order form on Color’s Provider Platform (getcolor.com/providers).
   • We accept Visa, MasterCard, Amex, or Discover. For the most current Color pricing, visit getcolor.com.

3. Give patient Color Kit and brochure to take home
   • Patient will provide a saliva sample from the comfort of their own home.
   • If collecting the sample in your office, ship it back via USPS in the prepaid box it came in. Make sure you submit the order form online on the Provider Platform or tuck it into the return box.

4. Submit order form at getcolor.com/providers
   • Make sure to include the barcode from your patient’s Color Kit, as well as their credit card info and email address.
   • You can fax the order form instead, if preferred. Processing will take 1-2 days longer.

5. Patient will finish up at home
   • After we receive and process your order, your patient will receive an email to set up their required Color account. This includes providing health history and informed consent.
   • Instructions for providing a saliva sample are included in patient’s Color Kit. Return postage has already been paid.

6. You will be notified when results are ready
   • Results will be returned directly to you through the Provider Platform, as well as fax.
   • Patient will be notified via email to view their results at getcolor.com based on your release preferences.

Important Information

• Kit barcode must be provided with the test order.
• Credit card to cover the cost of testing is required before we can process patient’s sample.
• No eating, drinking, smoking or chewing gum for 30 minutes before giving saliva sample.
